QUESTION 1

An external disk (eDisk) configured on a Symmetrix displays "Degraded" service state when you display detailed information about the disk using SYMCLI.

What state would you expect to see reported under the "DA hyper status" ?

A. Ready

B. Not Ready

C. Failed

D. Normal

Correct Answer: A

QUESTION 2

What will happen if one or more source (R1) devices in an SRDF/Synchronous consistency group cannot propagate data to their corresponding target (R2) devices?

A. Data propagation from all R1 devices in the consistency group to the R2 targets will be suspended

B. Data propagation from the specific R1 devices to their corresponding R2 targets will be suspended

C. SRDF/S replication will be suspended and a consistent data cleanup will be performed on the R2 targets

D. All RDF device pairs in the consistency group will be set to Not Ready

Correct Answer: A

QUESTION 3

What is the maximum number of entries allowed in a VMAX Initiator Group?

A. 8

B. 16

C. 32

D. 64

Correct Answer: C

QUESTION 4

A customer is planning to migrate data belonging to two applications (A and B) from an older array to a new Symmetrix

VMAX. Both migrations will run in parallel. However, it is necessary to transfer data from application A (session A) as fast as possible. The data from application B (session B) can be transferred at a slower rate.

Which settings should be used to run the two sessions?

A. The pace of session A should be set to 0. The pace for session B should be set to 9.

B. The pace for session A should be set to 9. The pace for session B should be set to 0.

C. Session A should be assigned to a Fibre Channel director with a ceiling setting of 100. Session B should be assigned to a different director with a ceiling value of 10.

D. Session A should be assigned to a Fibre Channel director with a ceiling setting of 10. Session B should be assigned to a different director with a ceiling value of 100.

Correct Answer: A

QUESTION 5

Which command can be used to backup all the masking information to a file and restore them from a backup file?

A. symaccess

B. symdg

C. symcg

D. symsg

Correct Answer: A
