QUESTION 1

You are proposing a storage solution using a VNX system. What will you tell the storage administrator about the default setting for VNX IP address filtering?

- A. Access is limited to a single Unisphere client.
- B. IP address filtering does not restrict any access.
- C. IP address filtering is not installed by default.
- D. IP address filtering prevents all communications until the VNX system is configured.

Correct Answer: B

QUESTION 2

In order to ensure that role-based access is enforced, the VNX storage domain has implemented two administrative groups called Auditors and Storage Admins. One of the administrators is a member of both groups. What access to objects will that administrator inherit?

- A. The least restrictive privilege established by the two groups
- B. The most restrictive privilege established by the two groups
- C. The first group that the administrator joined
- D. The last group that the administrator joined

Correct Answer: A

QUESTION 3

What are the components of the Common Event Enabler framework?

- A. Anti-Virus Agent and Event Publishing Agent
- B. Activity Logging and Data Verification
- C. Collection Agent and Datastore
- D. Unisphere Analyzer and SMI-S Provider

Correct Answer: A

QUESTION 4

A customer has a fragmented RAID group. The customer asks you what setting to select to defragment the RAID group as quickly as possible. What do you recommend?

- A. Set the defragmentation priority to High.
- B. Leave the defragmentation priority set to the default setting.
- C. Set the defragmentation priority to Low.
- D. The defragmentation priority cannot be changed.

Correct Answer: A

QUESTION 5

Which is a component of file system filtering?

- A. ACL
- B. GPO
- C. AD
- D. NTP

Correct Answer: A
