QUESTION 1

What must be available before creating a CIFS server?

- A. Windows domain controller
- B. WINS
- C. LDAP
- D. VNX CIFS service

Correct Answer: D

QUESTION 2

A customer is experiencing rapid growth in their storage environment and is struggling to respond quickly to new capacity requests. The storage team is spending most of their time moving applications between two pools in order to balance performance requirements - one with 270 x 300 GB 15K rpm drives, and one with 120 x 2 TB drives.

Which VNX feature would reduce complexity in the customer's environment?

- A. FAST Cache
- B. VLUN Migration
- C. VNX Replicator
- D. FAST VP

Correct Answer: D

QUESTION 3

A customer is concerned about maintaining the appropriate level of redundancy. The customer asks you to explain how VNX for File handles notification of system conditions and SNMP trap notifications. Which VNX hardware component should you discuss?

- A. Control Station
- B. Storage Processors
- C. Data Mover
- D. Link Control Card

Correct Answer: A

QUESTION 4

A current PowerPath Encryption customer plans to add a second VNX array to their production environment. They plan to use the VNX Host Encryption feature and ask whether any environment downtime is required to implement this new feature.

What should you advise?

- A. Adding VNX Host Encryption to an existing PowerPath Encryption environment is non- disruptive.
- B. They will need to set each HBA offline, one at a time, to add VNX Host Encryption.
- C. A host reboot is required to implement VNX Host Encryption in this environment.
- D. VNX Host Encryption cannot be integrated into environments with existing PowerPath Encryption.

Correct Answer: A

QUESTION 5

Unified Storage Management in VSI for VMware vSphere has which available features?

- A. Provision file and block storage Extend file and block storage Deduplication/compression for block storage VM clones with VMWare View Integration for file storage
- B. Provision file and block storage Extend file storage
Deduplication/compression for file storage
VM clones with VMware View Integration for file storage
- C. Provision file and block storage Extend block storage Deduplication/compression for file storage VM clones with VMWare View Integration for file storage
- D. Provision file and block storage Extend file and block storage Deduplication/compression for block and file storage VM clones with VMWare View Integration for block storage

Correct Answer: B
