### QUESTION 1

In VNX OE for File, which type of device is used to logically reduce disk volumes into smaller partitions to improve usage?

- A. Stripe
- B. Slice
- C. Disk
- D. Meta

Correct Answer: B

---

### QUESTION 2

A customer has a VNX system that uses only RAID 6 configured as 6+2 groups. The VNX model supports a maximum of 500 drives. They intend to use Clones for local replication and backups, and MirrorView/S for remote replication.

What is the size of the largest Pool they can create?

- A. 492 drives
- B. 496 drives
- C. 500 drives
- D. 488 drives

Correct Answer: D

---

### QUESTION 3

Where, in Unisphere, can a Storage Administrator see a host that has not yet been connected to Storage Group?

- A. Initiators tab, part of the "~management" Storage Group
- B. Storage Groups tab, listed as "unassigned"
- C. Hosts tab, listed as "unassigned"
- D. Initiators tab, listed as "available hosts"

Correct Answer: A

---

### QUESTION 4

Which RAID type can be expanded?

- A. RAID 5
- B. RAID 1
- C. RAID 3
- D. RAID 6

Correct Answer: A

---

#### QUESTION 5

A company wants to connect four different IP subnets to a single existing LACP trunk. How can this be accomplished?

- A. Configure four different IP addresses on the virtual LACP interface with different names.
- B. Destroy the LACP trunk and configure two IP addresses on each physical interface with different names.
- C. Destroy the LACP trunk and build an Ethernet channel; then configure four different IP addresses on the virtual Ethernet channel interface with different names.
- D. This is not possible because only one IP address can be set on one interface.

Correct Answer: A
