### QUESTION 1

A customer is suspicious of unauthorized access to their VNX file share. IT management needs to monitor user activity and access.

What can be done to accomplish this?

- A. Enable and define the audit policy per CIFS server
- B. Enable and configure CEPA on the VNX
- C. Enable and configure CAVA on the VNX
- D. Install Microsoft SCOM to monitor the VNX CIFS servers

Correct Answer: A

---

### QUESTION 2

What is a valid statement about the characteristics of certificates on the VNX system?

- A. Default certificates are in place for SP A, SP B, Control Station(s), and Data Movers
- B. Default certificates are self-signed 1024-bit RSA keys
- C. All certificates are self-signed
- D. Default certificates are self-signed 2048-bit RSA keys

Correct Answer: D

---

### QUESTION 3

Which protocol enables the customer to access the Control Station over IP?

- A. SSH
- B. SNFS
- C. CIFS
- D. NTP

Correct Answer: A

---

### QUESTION 4

What are characteristics of VNX Host Encryption?

- A. Software-based Allows the user to select which data to encrypt
- B. Hardware-based Allows the user to select which data to encrypt
- C. Software-based Encrypts all data stored on the VNX by default
- D. Hardware-based Encrypts all data stored on the VNX by default

Correct Answer: A

---

#### QUESTION 5

A customer has reported degraded performance with several of the applications that run on a VNX. After going through the performance data on the array, you find that all the performance issues are centered around the same RAID 6 group, and that the RAID group is supplying 50 percent less IOPS than before.

What is the most likely reason?

- A. The RAID group is being rebuilt.
- B. The RAID group is trespassed.
- C. Write cache is not configured.
- D. The RAID group is being defragmented.

Correct Answer: A
