QUESTION 1

You are provisioning a LUN on a VNX array with FAST VP enabled. In addition to Highest Tier Available and Lowest Tier Available, what other tier option(s) is displayed?

A. Auto-Tier

B. Auto-Tier, No Data Movement

C. Optimize for Performance, No Data Movement

D. Optimize for Performance

Correct Answer: A

QUESTION 2

An administrator tries to modify the quota settings on a CIFS share from a Windows Server 2003 host, but the Quota tab does not exist in the network drive properties. What could be a possible cause?

A. Exporting is implemented at the file system subdirectory level on VNX OE for File.

B. Windows users cannot modify the quota settings.

C. The user does not have administrator privileges on this share.

D. Quotas can be managed only with Windows Server 2008.

Correct Answer: A

QUESTION 3

A customer wants to decrease the size of VNX pool LUNs presented to an MSCS cluster using the LUN shrink feature.

What do you advise?

A. The LUN shrink feature is not supported with MSCS clusters.

B. LUN shrink is only supported with stand-alone hosts.

C. The accessible volume space on the host must be reduced first.

D. The LUN shrink feature will allow them to reduce LUN sizes for this cluster.

Correct Answer: A

QUESTION 4

What is the preferred method for partitioning VNX FC LUNs attached to a Windows Server 2008 R2 host?

A. Disk Management

B. format

C. fdisk

D. vtoc

Correct Answer: A

QUESTION 5

Which statement is true regarding LUN migration within a VNX array?

A. There may be a performance impact.

B. The source LUN remains unchanged after the copy completes.

C. You cannot cancel a LUN migration once it has started.

D. The destination LUN retains its LUN ID and WWN when the copy completes.

Correct Answer: A
