**QUESTION 1**

Which feature can be used without requiring an additional license on an EMC Data Domain system?

- A. Snapshots
- B. Replication
- C. Encryption
- D. DD Boost

Correct Answer: A

QUESTION 2

When replicating backup data, what is an advantage of EMC Data Domain inline deduplication compared to products that use post-process deduplication?

- A. Fastest time to disaster recovery readiness
- B. Lowest LAN bandwidth consumption during replication
- C. Data is backed up before it is replicated
- D. Data integrity is guaranteed

Correct Answer: A

QUESTION 3

An EMC NetWorker administrator needs to perform a recovery of data from a failed client to a new client. Which type of recovery should be performed?

- A. Disaster
- B. Server
- C. Directed
- D. Save set

Correct Answer: C

QUESTION 4

An EMC NetWorker client is backing up to a deduplication node. Where does the Client File Index reside for the files backed up to this node?

- A. NetWorker server
- B. Utility node
- C. NetWorker storage node
- D. Backup client

Correct Answer: A

QUESTION 5

A customer has an existing environment where a tape library is the target for backups. The tapes are then shipped offsite where they are stored and can be used for disaster recovery. The customer wants to eliminate the tape library and any truck delivery but still have copies sent offsite. They want to keep their backup process in place. What is the most efficient type of Data Domain replication that meets this requirement?

- A. Container
- B. Directory
- C. Pool
- D. Collection

Correct Answer: C

Pool Replication

- A type of Directory Replication
- Replicates directories that contain VTL tape cartridges (pools)
- VTLs use storage pools
- VTL license not needed on destination
