QUESTION 1

What is an advantage of using backup from within the cloud with Dell EMC NetWorker and a CloudBoost appliance?

- A. Cloud-protected storage for long-term backups only
- B. Backup data deduplication at the source
- C. Support for Client Direct with Windows clients
- D. Fast restore from local cache copies using site cache

Correct Answer: B

QUESTION 2

An EMC NetWorker customer wants to exclude all .jpg files from backups for all Solaris hosts. Backups are initiated from both the client and server.

How should this be enforced?

- A. Client-side directive
- B. AES directive
- C. NetWorker user local directive
- D. Server-side directive

Correct Answer: A

QUESTION 3

What is a characteristic of a Dell EMC NetWorker module backup?

- A. API determines what is included in the backup save streams
- B. Module-specific NetWorker backup command runs on the NetWorker server
- C. Backup data always goes through the storage node to the storagedevice
- D. Block based backups are used for all database backups with NetWorker

Correct Answer: C

QUESTION 4

A Dell EMC NetWorker administrator is performing a directed recovery in a Microsoft Windows cluster environment.

What is the role of the active node when recovering data to the virtual client?

- A. Administering client
- B. Destination client
- C. Source client
- D. NMC client

Correct Answer: C
