QUESTION 1

A company has 50 clients backing up to an EMC Avamar server. The storage administrator has decided to enable desktop/laptop (DTLT) support for several of the Microsoft Windows client machines. Where is this support enabled?

- A. Avamar client software installation
- B. Avamar Windows Client Options menu
- C. Avamar Administrator Policy window
- D. Windows File System plug-in

Correct Answer: A

QUESTION 2

What must be installed to perform Avamar file level recoveries of Exchange 2010 databases?

- A. Avamar Exchange Database and Exchange Message plug-ins
- B. Avamar Exchange VSS and Exchange GLR plug-ins
- C. Avamar Exchange Database plug-in and Exchange Recovery Storage Group
- D. Avamar Exchange VSS plug-in and Exchange Recovery Storage Group

Correct Answer: B

QUESTION 3

What is a characteristic of variable block deduplication?

- A. Better granularity and more efficiency
- B. Commonly provided in snapshot technologies
- C. Small changes require all segments to change
- D. Most common deduplication method

Correct Answer: A

QUESTION 4

A customer has three remote sites that contain large NAS mounted file systems. They would like to back up to their centrally located EMC Avamar server. What is the recommended method for performing these backups?

- A. Install NDMP accelerator nodes in each remote site, backing up to the centrally located Avamar grid over the WAN
- B. Install an NDMP accelerator node at the central site for all remote site NDMP backups through the WAN links
- C. Install Avamar client software on the NAS devices in each remote site, backing up to the centrally located Avamar grid over the WAN
- D. Install Avamar client software on servers which have the file systems mounted and schedule the jobs through the Administrative Console GUI

Correct Answer: A

QUESTION 5

Table 3 Minimum requirements for AVE

	0.5 TB AVE	1 TB AVE	2TB AVE	4 TB AVE
Processors	Minimum two 2 GHz processors	Minimum two 2 GHz processors	Minimum two 2 GHz processors	Minimum four 2 GHz processors
Memory	6 GB	8 GB	16 GB	36 GB
Disk space	850 GB	1,600 GB	3,100 GB	6,100 GB
Network connection	1 GbE connection	1 GbE connection	1 GbE connection	1 GbE connection

What is the minimum physical memory that needs to be allocated to an EMC Avamar Virtual Edition with 2 TB of licensable capacity?

- A. 3072 MB
- B. 4096 MB
- C. 8192 MB
- D. 16384 MB

Correct Answer: D
