- D. Array Issues Summary

Correct Answer: A

---

#### QUESTION 2

You are working on a VNX Block system that has a fault LED illuminated on a DAE. What action would you take to further analyze the system status?

- A. Launch USM and perform a Verify Storage System operation.
- B. Install VNX Analyzer to capture the DAE hardware status.
- C. Perform a background verify operation on the system's LUNs.
- D. Trespass the system's LUNs to the peer storage processor.

Correct Answer: A

---

#### QUESTION 3

Which describes a direct-attached VNX gateway system with a VNX Block back end?

- A. Each Data Mover has two paths to the VNX Block system where each of the two Data Mover HBAs has a single path to an SP.
- B. Each Data Mover has four paths to the VNX Block system where each of the two Data Mover HBAs has a path to SP A and SP B.
- C. Each Data Mover has eight paths to the VNX Block system where each of the four Data Mover HBAs has a path to SP A and SP B.
- D. Each Data Mover has four paths to the VNX Block system where each of the four Data Mover HBAs has a single path to an SP.

Correct Answer: A

---

#### QUESTION 4

When performing an installation recovery of VNX OE File to pre-VIA initialization state what impact should be considered?

- A. Reboot the primary DM to force a configuration backup to the standby DM prior to the cleanup.
- B. The back-end cleanup process destroys all file systems and back-end storage.
- C. File systems are preserved but the Control Station and Data Movers must be reconfigured.
- D. File systems are preserved but exports and share configuration must be restored.

Correct Answer: B

---

#### QUESTION 5

You have just replaced a defective component in a Data Mover. Which command can be run to verify the system returns no errors?

- A. # /nas/bin/nas\_checkup
- B. # /nas/bin/nas\_server -info -all
- C. # watch /nasmcd/getreason
- D. # dmesg

Correct Answer: A
