QUESTION 1

A customer is implementing an Etherchannel environment. They are concerned about how the VNX will handle the traffic load distribution. What is used by EMC VNX to distribute the traffic in an efficient manner?

- A. IP Address
- B. EUI
- C. Round Robin
- D. Serial Number Seed

Correct Answer: A

QUESTION 2

The SQL database and transaction logs have been physically isolated on separate RAID groups. What other actions can be taken to optimize SQL performance?

- A. Use RAID 1/0 for transaction logs only.
- B. Use RAID 5 for transaction logs and tempDB.
- C. Use RAID 5 for tempDB only.
- D. Use RAID 1/0 for transaction logs and tempDB.

Correct Answer: D

QUESTION 3

Which RPA test provides a quick and easy way to determine if the required TCP ports for RecoverPoint are blocked?

- A. Run the Port Diagnostics test as the boxmgmt user
- B. Open Unisphere for RecoverPoint using the site management address
- C. Run the Port Diagnostics test as the admin user
- D. Log in to an RPA using SSH as the admin user

Correct Answer: A

QUESTION 4

A customer wants to migrate a LUN from one EMC VNX to another. The customer wants to use the integrated LUN migration feature. Due to a change freeze, the customer can install additional software, but cannot add any additional hardware. What do you recommend?

- A. Use SAN Copy, rather than LUN migration
- B. Configure target LUNs 20% larger than source LUNS
- C. Configure Thin source LUNs and Thick target LUNs
- D. Use RecoverPoint, rather than LUN migration

Correct Answer: A

QUESTION 5

A customer is asking you for help. They are creating a script that will collect data from the array using CLI from the Control Station. They want to gather information on LUN data consumption including metadata, snapshot and compression.

Which command will gather this information?

- A. `navicli -h spa lun -list -l 0 all`
- B. `navicli -h spa lun -list -l 0`
- C. `navicli -h spa getdisk 0_0_0 -all`
- D. `navicli -h spa getcontrol -all`

Correct Answer: A
