QUESTION 1

Refer to the exhibit.

```
ping statistics for 10.127.199.55:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
Approximate round trip times in milli-seconds:
    Minimum = 17ms, Maximum = 309ms, Average = 32ms
```

A Dell EMC Avamar backup administrator is determining the TCP window size to be used. The WAN link is 100 Mbps. What is the value of the BDP?

A. 212,500 bytes

B. 400,000 bytes

C. 3,200,000 bytes

D. 3,862,500 bytes

Correct Answer: B

QUESTION 2

An EMC customer is using NetWorker with integrated Avamar deduplication nodes. They have expired a large amount of data on the NetWorker server. After several hours, they notice that the index entries have been deleted from NetWorker. However, data has not been removed from the deduplication node. What is a potential reason?

A. Garbage collection has not yet occurred on the deduplication node

B. Data must also be manually expired from within Avamar

C. Garbage collection has been suspended on the NetWorker server

D. Saveset metadata has not been purged from the storage node

Correct Answer: A

QUESTION 3

An EMC customer has a Celerra NAS device that hosts user home drives. The Celerra is being backed up using an Avamar NDMP Accelerator. A request is issued to restore a Home directory to a Microsoft Windows 2003 host. How can this data be restored while preserving the ACLs?

A. Restore the data directly to the Celerra

B. Restore directly to the Windows 2003 host

C. Modify the client type in the drop down menu of the restore screen

D. Use \\'More Options\\' and select \\'overwrite existing files= never\\'

Correct Answer: A

QUESTION 4

An EMC Avamar customer has used Avamar Administrator to configure backups of their Oracle databases using two RMAN channels. They also use RMAN scripts to run backups of the databases to the Avamar server using four RMAN channels.

According to best practices, what should you advise the customer?

A. Do not mix RMAN and server-initiated backups.

B. Use a single set of cache files.

C. Minimize the number of RMAN channels.

D. Disable RMAN backup optimization.

Correct Answer: A

QUESTION 5

A customer with a single server MS Exchange 2010 solution is using Avamar as its backup solution. They are adding two more standalone Exchange servers to enhance the performance of their email environment. What needs to be configured in Avamar to back up data from all three servers?

A. Install Exchange VSS client on the new servers.

B. Install and configure the Avamar Windows Cluster Client to include the new servers.

C. Uninstall the Exchange VSS Client from the first server and reinstall this client on all three servers.

D. Install the legacy Avamar 6.0 Exchange Database plug-in on all three servers.

Correct Answer: A
