QUESTION 1

You are implementing a deduplication node in a new EMC NetWorker environment. You have already configured the Avamar server and are now creating the AFTD for metadata storage. What is a consideration in configuring the device?

A. Dedicated to the deduplication node

B. Located in the root directory

C. Resides on the NetWorker server

D. Configured for the default pool

Correct Answer: A

QUESTION 2

A database administrator added a 500 GB DB2 database that is being backed up online through the Avamar DB2 plug-in. They have been instructed to shorten the backup time of the database due to the Avamar backup window being quite full when the backup takes place.

Which logs can the administrator exclude from the backup to meet this requirement?

A. Archive logs

B. Redo logs

C. Transaction logs

D. System logs

Correct Answer: A

QUESTION 3

An existing EMC Avamar customer has noticed that garbage collection is not running properly on a daily basis. The garbage collection logs show the process failing with the MSG_ERR_FULL error each time it attempts to run. The Avamar Administrator reports the server capacity as 96%.What could be causing garbage collection to fail?

A. GSAN capacity is over 85%

B. Operating system capacity is over 85%

C. Operating system capacity is over 65%

D. Avamar server has reached the health check limit

Correct Answer: B

QUESTION 4

An EMC customer wants to use LDAP authentication for their Avamar administrator user accounts. While testing the settings of the ldap.conf file with an ldapsearch string, a failure occurs with error "525: User Not Found"

Which entry in the ldap.conf file is the root cause for this error?

A. binddn

B. realm

C. bindpw

D. ldap_version

Correct Answer: A

QUESTION 5

An EMC Avamar customer is having trouble backing up one of their file servers. They are able to ping the Avamar server from the client and vice versa. However, they are unable to browse the client directories.

What should be done to fix this issue?

A. Deactivate the client, then activate it.

B. Open firewall port 27000 on the client.

C. Delete and reactivate the client.

D. Start the Avamar Agent service on the client.

Correct Answer: A
