QUESTION 1

An ArcGIS user wants to load data into a point feature class. As the user loads the data he needs to be able to honor the current snapping environment settings in ArcMap and also apply the existing topology validation rules.

Which tool allows the user to accomplish this task?

- A. Simple Data Loader
- B. Object Loader
- C. Add XY Coordinates
- D. Append

Correct Answer: B

QUESTION 2

An ArcGIS user has an .mxd file with layers referencing data from ArcSDE.

What should a user do to check the ArcSDE geodatabase versioning information of a layer's feature class?

- A. select the Show Full Paths button
- B. select the List by Sources button
- C. select the View Metadata button
- D. select View Map Document Properties button

Correct Answer: D

QUESTION 3

An ArcGIS user's plotter will only print up to 42 inches. However, the user is trying to print a large plot (84 inches x 60 inches) for a wall map.

What must the ArcGIS user do to print the wall map?

- A. divide the map data frames and tile them to measure 84x60
- B. modify the printer settings to apply a tile to match the 84x60 output size
- C. in Layout view stretch the data frame to the 84x60 output size
- D. set up Data Driven Pages to match the page layout size of 84x60

Correct Answer: A

QUESTION 4
