Correct Answer: ABE

---

### QUESTION 2

Which two statements are true concerning Administrator Groups in FileMaker Server 11? (Choose two.)

- A. Administrator Groups may be nested.
- B. The Administrator Groups feature is only available in FileMaker Server 11 Advanced.
- C. A group administrator can disconnect clients from databases in their Administrator Group.
- D. A group administrator can limit the numbers of clients that can access hosted files within their Administrator Group.
- E. A group administrator can change the FileMaker security settings for all databases in their Administrator Group.

Correct Answer: BC

---

### QUESTION 3

Which two are true about using Current Found Set as the data source for a bar chart in FileMaker Pro 11? (Choose two.)

- A. A user will generate a stacked bar chart if they specify one or more fields that contains a returndelimited list as the data series.
- B. Unless a user selects the option to Show data points for groups of records when sorted, the chart will maximally include the first 250 records (based on the sort order) of the found set.
- C. If a user selects the option to Show data points for groups of records when sorted, sorts the data, and puts the chart in a Trailing Grand Summary, the chart will display one data point per sort group.
- D. If a user selects the option to Show data points for groups of records when sorted, sorts the data by two criteria, and puts the chart in a Subsummary part based on the first sort criteria, the chart will display one data point per secondary sort group.

Correct Answer: CD

---
