QUESTION 1

A FileMaker Pro 11 file is hosted by FileMaker Server 11. In the course of working with the file, users run scripts that access and update a global variable called \$\$currentTransactionCount.

Which statement is true about this situation?

- A. \$\$currentTransactionCount does not exist when the file is opened.
- B. The value of \$\$currentTransactionCount will be initialized to a null value each time the user opens the file.
- C. If the value of \$\$currentTransactionCount is changed by a serverside script, all loggedin users will see the new value.
- C. When a user logs into the file, the value in \$\$currentTransactionCount will be the value the variable had when the user last logged out.
- D. Whenever a user runs a script that updates the value of \$\$currentTransactionCount, all other loggedin users will see the changed value.

Correct Answer: A

QUESTION 2

Which two are required to make a FileMaker Pro database accessible to remote applications using JDBC? (Choose two.)

- A. The database is hosted using FileMaker Server 11 Advanced.
- B. A properly configured DSN is installed on the computer hosting the database.
- C. The ISAPI Filters must be enabled on Windows IIS (Internet Information Server).
- D. A Java Virtual Machine (JVM) must be installed on the computer hosting the database.
- E. The database has the [fmjdbc] extended privilege enabled in at least one privilege set associated with an active account.

Correct Answer: AE

QUESTION 3

Which two statements are true about windows in a FileMaker database? (Choose two.)

- A. A given user may have a maximum of 100 windows open concurrently.
- B. Creation of a new window will activate an OnLayoutEnter script trigger.
- C. On the Windows platform, only the currently active window can be maximized.
- D. The Adjust Window script step can be used to move a window to a location specified by a calculation formula.

Correct Answer: BC

QUESTION 4

Which statement is true about the use of encryption in FileMaker 11?

- A. Network traffic between FileMaker Pro 11 and an ODBC client can be encrypted.
- B. Network traffic between FileMaker Server 11 and the Web Publishing Engine can be encrypted.
- C. When FileMaker Pro 11 is a client of another copy of FileMaker Pro 11, the network traffic between the two can be encrypted.
- D. When FileMaker Pro 11 is a client of FileMaker Server 11, the network traffic between the two can be encrypted and the data stored on FileMaker Server 11 is encrypted on disk.

Correct Answer: B

QUESTION 5

There are two fields, Amount and Attainment. Each field is defined to have three repetitions and contain the following data:

Given the following formula in a nonrepeating calculation field:

Amount	Attainment
\$10.00	50%
\$25.00	100%
\$30.00	150%

Let([

\$x[1] = 1

\$x[2] = 2

\$x = Attainment]

(\$x[2] * Amount) * \$x[1]

)

What is the result?

- A. 5
- B. 10
- C. 12.5
- D. 20

E. 25

F. 50

Correct Answer: B
