**QUESTION 1**

Peter works as a Programmer in Magi Net Inc. He writes the following code.

```
1.
class Ques0190{
2.
    public static void main(String[] argv){
3.
        byte a = 100;
4.
        switch(a){
5.
            case 10.
6.
                System.out.println("ten");
7.
            case 100.
8.
                System.out.println("hundred");
9.
            case 1000.
10.
                System.out.println("thousand");
11.
        }
12.
    }
13.
}
```

What will happen when Peter attempts to compile and execute the code?

- A. The code will compile and execute displaying hundred.
- B. The code will not compile because 1000 is not assignment compatible with a byte data type.
- C. The code will not compile because the argument to the switch cannot be a primitive type byte value.
- D. The code will compile and execute displaying hundred followed by thousand.

Correct Answer: B

QUESTION 2

Mark works as a Programmer for InfoTech Inc. He develops the following code for a Web application named JavaSecurity Application.

A JavaSecurity Application

...

Manager

Admin

Programmer

Admin

Employee
