QUESTION 1

You work as a Software Developer for ABC Inc. You create an application, and you want to define a component for your application. In some deployments, the component will be deployed on the same computer as the application. In other deployments the component will be deployed on a separate computer. You create a Web service. You want a new object of the Web service to be created whenever a customer makes a call to the Web service. Drag and drop the appropriate statement to accomplish the task.

A.

Correct Answer: A

QUESTION 2

George works as a Software Developer for GenTech Inc. He creates an application named App1 using Visual Studio .NET. App1 uses the version 2.0.0.0 of an assembly named Assembly1. However, he wants App1 to use a new version i.e.

2.1.0.0 of Assembly1. Therefore, he needs to specify Assembly1\\'s location so that App1 can use version 2.1.0.0 of Assembly1. What will George use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. An unmanaged code.

B. A managed code.

C. The element.

D. The element.

Correct Answer: CD

QUESTION 3

Allen works as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2008 as its application

development platform. Allen develops an application using .NET Framework 3.5. The application connects to a SQL Server database using a SqlConnection object named Connection1. He creates some stored procedures in the database, which are used to update the data. Allen finds that sometimes, the update operation does not affect any row. He wants to add an error handling code to the application. Which of the following code segments will he use to accomplish the task?

A. try { Connection1.open(); } catch(DataException Myexcept) { //Error-handling code }

B. try { Connection1.open(); } catch(SqlException Myexcept) { //Error-handling code }

C. try { Connection1.open(); } catch(DBConcurrencyException Myexcept) { //Error-handling code }

D. try { Connection1.open(); } catch(InvalidCastException Myexcept) { //Error-handling code }

Correct Answer: C

QUESTION 4

Which of the following code snippets is an example of tight encapsulation?

A. private int x; public void fun(){x=5;}

B. private int x; private void fun(){x=5;}

C. public int x; public void fun() {x=5;}

D. protected int x; protected void fun(){x=5;}

E. int x; public void fun(){x=5;}

Correct Answer: A

QUESTION 5

You work as a Software Developer for InfoTech Inc. You create a Windows form in a Windows- based application named MyWinApp1. You use graphics in the form. You write the following code in your form: private void MyMouseEvent1(object sender1, MouseEventArgs event) { // Code to handle mouse events } You want to implement a property of the MouseEventArgs object. This property will return a Point structure that contains the x-coordinate and y-coordinate of the mouse. Which of the following properties of the MouseEventArgs object will you

use to accomplish this?

A. Y

B. Delta

C. Location

D. Button

E. Clicks

F. X

Correct Answer: C
