QUESTION 1

You work as a Software Developer for Blue Well Inc. You create a mobile Web application for

mobile users. You want to ensure that a cookieless session is implemented on it. Which of the following statements are the main reasons of implementing a cookieless session on a mobile Web application?

Each correct answer represents a part of the solution. Choose two.

- A. Maintains session state of each user
- B. Stores data in Web server memory
- C. Tests mobile Web applications
- D. Ensures better compatibility with mobile devices

Correct Answer: AD

QUESTION 2

Peter works as a Software Developer for PaulTech Inc. He develops an application for office management, using Visual C# .NET. He creates an OleDbConnection object, named Pcon. He wants to create an OleDbCommand object to retrieve employee details. Which of the following statements will Peter use to set the CommandText and Connection properties to accomplish the required task?

Each correct answer represents a part of the solution. Choose three.

- A. OleDbCommand PCommand = new OleDbCommand("sp_GetDetails", PCon);
- B. PCommand.CommandType = "SELECT * FROM Employees";
- C. PCommand.Connection = Pcon;
- D. PCommand.CommandText = "SELECT * FROM Employees";
- E. PCommand.SetConnection (PCon);
- F. OleDbCommand PCommand = new OleDbCommand();

Correct Answer: CDF

QUESTION 3

You work as a Software Developer for ABC Inc. You develop a multi-threaded application named MyMultThreadApp using Visual Studio .NET. The application logs all warning and informational messages in an event log that keeps track of significant events when the application is running. The event log records information that might be useful for troubleshooting or performance analysis. Which of the following are the considerations that you must keep in mind when logging events with multithreaded components?

Each correct answer represents a complete solution. Choose three.

- A. An exclusive lock should be obtained on the log to avoid race conditions.
- B. Each shared component should be thread-safe when interacting with an event log.
- C. The System.Threading namespace should be used to record the identity of each thread for logging messages.
- D. The Debug and Trace classes should be used to log events.

Correct Answer: ABC

QUESTION 4

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2008 as its application development platform. You create an ASP.NET Web application using .NET Framework 3.5. You create a Web form in the application that permits users to provide personal information. You add a DropDownList control to the Web form to retrieve the residential status of users. The default item that the DropDownList control displays is the "Select Country" option. You have to ensure that users select a country other than the default option. Which of the following validation controls should you use to accomplish this task?

- A. RangeValidator
- B. RequiredFieldValidator
- C. CustomValidator
- D. RegularExpressionValidator

Correct Answer: B

QUESTION 5

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. You create an application named MyApplication. MyApplication uses the System.IO namespace. You want to ensure that you are able to use a class that specifies read and write operations either in synchronous or asynchronous manner. Which of the following classes will you use to accomplish the task?

- A. StreamReader
- B. FileStream
- C. StreamWriter
- D. MemoryStream

Correct Answer: B
