### QUESTION 1

A person's phone number is not considered PHI because it can be located in an online or paper telephone directory.

- A. True
- B. False

Correct Answer: B

---

### QUESTION 2

Administrative Safeguards on Security Awareness related to electronic Protected Health Information (PHI) and Log-in Monitoring includes all, EXCEPT:

- A. Review the system's login reports at regular intervals
- B. Prohibit the sharing of passwords among any employees, paid or unpaid
- C. Limit the number of attempts a computer user can make at a log-in attempt
- D. Use of software that locks the user out of the system after a certain number of unsuccessful log-in attempts are made

Correct Answer: B

The least appropriate answer is to prohibit the sharing of passwords among any employees, paid or unpaid.

---

### QUESTION 3

Marcus is responsible for security management within a HIPAA-covered entity. He is reviewing administrative safeguards and examining the organization's risk analysis. Which element is NOT part of risk analysis?

- A. Developing adequate communication with all contractors, interns, and staff in relation to the agency's security policies
- B. Assessing vulnerabilities of integrity and availability of electronic personal health information
- C. Determining how client electronic personal health information confidentiality may be compromised
- D. Determining barriers in existence to needed client electronic personal health information

Correct Answer: A

Developing communication is not a function of risk analysis.

---

### QUESTION 4

The U.S. healthcare system has been referred to "a paradox of excess and deprivation" because.

- A. Some people receive too little care because they are uninsured.
- B. Some people receive too little care because they are inadequately insured.
- C. Some people receive too much care that is costly.
- D. All of the above.

Correct Answer: D

---
