### QUESTION 1

A customer wants to add a second DKC to a VSP.

Which three hardware features must be installed in the second DKC? (Choose three.)

- A. Hub
- B. VSD
- C. CMA
- D. ESW
- E. DKA

Correct Answer: ABD

---

### QUESTION 2

The SVP has failed on a VSP and you have ordered a replacement.

Which functionality is still available while waiting for the new SVP to arrive on site?

- A. Configuration changes can be made using raidcom commands.
- B. Hitrack can continue monitoring the VSP and report errors.
- C. Configuration changes can be made using HiCommand CLI.
- D. ShadowImage pairs can be managed with RAID Manager/CCI.

Correct Answer: D

---

### QUESTION 3

A customer wants to change a RAID Group from RAID 5 (7+1) to RAID 6 (6+2) during normal operation on a VSP. What must be done regardless of the System Option Mode (SOM) settings?

- A. The customer must modify the RAID level in Storage Navigator 2.
- B. The engineer must change the RAID level in the SVP Maintenance window.
- C. The customer must backup and unmap the LUNs from the RAID 5 (7+1) RAID Group.
- D. The engineer must remove all the disk drives from the RAID 5 (7+1) RAID Group, re-install and re-configure them.

Correct Answer: C

---

#### QUESTION 4

Your customer wants to connect multiple servers with different operating systems to the same port on a VSP.

What is the first step when configuring the port?

- A. Map a LUN.
- B. Register a WWPN.
- C. Enable Port Security.
- D. Create a Host Group.

Correct Answer: C

---

#### QUESTION 5

When creating a Cache Logical Partition (CLPR) on a VSP using Virtual Partition Manager, which resource can be added to the CLPR?

- A. LDEVs
- B. Front-end Directors
- C. Device Groups
- D. Parity Groups

Correct Answer: D
