QUESTION 1

Which two actions must be performed when planning an online microcode exchange on a VSP? (Choose two.)

- A. Force production host data paths to failover to the alternate cluster.
- B. Confirm that all LUNs, external storage and remote replication links have paths across both clusters.
- C. Save the contents of the shared memory to the SVP hard disk.
- D. Ensure that the microprocessors are less than 50 percent busy.

Correct Answer: BD

QUESTION 2

What are two effects of persistent binding? (Choose two.)

- A. Persistent binding can speed up path failover.
- B. Persistent binding guarantees Command Device security.
- C. Persistent binding can speed up the server boot process.
- D. Persistent binding guarantees that target assignments are preserved between reboots.

Correct Answer: CD

QUESTION 3

What are two prerequisites for virtualizing volumes on a VSP? (Choose two.)

- A. Shared memory must be reserved for external storage operations.
- B. The external storage system must be connected to one or more external ports of the VSP.
- C. A CLPR must be created for the external storage.
- D. The Universal Volume Manager license must be installed in the VSP.

Correct Answer: BD

QUESTION 4

You have set Extended Round Robin in Hitachi Dynamic Link Manager (HDLM) running on a server with intensive sequential I/O profile. Which two benefits result from implementing this algorithm? (Choose two.)

- A. tracks preloaded to cache

- B. blocks held permanent in Read Cache
- C. no tracks preloading on the system
- D. efficient cache usage on the storage system

Correct Answer: AD

QUESTION 5

Which three tasks can be performed on a VSP with Hitachi Device Manager? (Choose three.)

- A. create Pools
- B. create LUNs
- C. create Parity Groups
- D. modify Pools
- E. modify SNMP settings

Correct Answer: ABD
