QUESTION 1

What are two functions that can be done using the Storage Navigator Modular 2 Logical Unit wizard on a Hitachi Unified Storage system? (Choose two.)

- A. Create multiple LUs.
- B. Create a new RAID Group.
- C. Enable Host Group Security.
- D. Select SATA II drives for LU creation.

Correct Answer: AB

QUESTION 2

A customer has installed a Hitachi Unified Storage (HUS) system with only port 0A connected to a Linux server. There is a video streaming application running on the server. You have to perform a firmware update using SNM2. What will happen when the update is started?

- A. The Linux application will continue to function non-disruptively.
- B. The Linux server will time-out because there is no alternate path.
- C. The firmware update process will abort if the HUS does not have at least 5 seconds of no I/O activity on port 0A within 5 minutes.
- D. The firmware update will fail because the HUS active/active controller feature checks for alternate pathing.

Correct Answer: A

QUESTION 3

You are connecting a Hitachi Unified Storage system to a FC SAN. Which topology setting should you select?

- A. Loop
- B. Fabric
- C. Point-to-Point
- D. Fabric Point-to-Point

Correct Answer: C

QUESTION 4

Which two expansion trays are supported on Hitachi Unified Storage (HUS) model 110? (Choose two.)

- A. 2U tray to hold up to 24 SFF drives
- B. 2U tray to hold up to 12 LFF drives
- C. 4U tray to hold up to 48 LFF drives
- D. 4U tray to hold up to 38 SFF drives

Correct Answer: AB

QUESTION 5

A customer wants to migrate data from existing modular storage arrays to a newly acquired Hitachi Unified Storage system. To prepare for the storage migration, you have been asked to collect operation data that encompasses multiple storage systems and their attached hosts. Which tool would you use?

- A. auperfmon
- B. raidcom
- C. SE Console
- D. HiPAST

Correct Answer: C
