QUESTION 1

A customer must have 24/7 uptime on their Hitachi NAS Platform 4-node 3200 cluster. They need to complete a major upgrade on each of the 4 nodes and must have a method of failing over their production services to a non-production cluster. Which two topics must be discussed with the customer prior to the major upgrade? (Choose two.)

- A. automatic failover using HiTrack
- B. the purchase of a backup cluster
- C. establishing a Server Farm
- D. use of MPIO for failover

Correct Answer: BC

QUESTION 2

You are discussing Fibre Channel (FC) connectivity requirements with a customer who is comparing the capabilities of the different Hitachi NAS Platform models. Which model has a minimum connectivity requirement of 4 FC ports?

- A. 2200
- B. 3080
- C. 3100
- D. 3200

Correct Answer: D

QUESTION 3

A customer has asked you to plan a server consolidation of their Windows server environment consisting of 44 Windows 2003 servers. 6,500 users use these servers to store data files in departmental shares as well as home directories. The customer has requested that you identify points of contention with your consolidation strategy and solution design. Which three potential points of contention must you address? (Choose three.)

- A. the number of concurrent users per server being consolidated
- B. the make and model of the servers being consolidated
- C. the load balance of EVSs per node
- D. the hot fix versions running on the Windows 2003 servers
- E. the peak workload of each server being consolidated

Correct Answer: ACE

QUESTION 4

A customer has just implemented anti-virus scanning on their Hitachi NAS Platform and they are experiencing degraded performance since the implementation. Which three actions can the customer take to improve performance? (Choose three.)

- A. Increase the number of anti-virus scanning servers.
- B. Enable SMB signing to reduce protocol overhead.
- C. Upgrade the anti-virus scanning servers to a higher performance class.
- D. Optimize the network connectivity between the anti-virus scanning servers and the Hitachi NAS Platform.
- E. Enable ICMP on the anti-virus scanning servers.

Correct Answer: ACD

QUESTION 5

You are creating a deployment plan for a new Hitachi NAS Platform customer that will meet their recovery and data consolidation requirements for their NFS and CIFS data. Which two key infrastructure areas must you identify for the design? (Choose two.)

- A. Recovery Point Objective
- B. types of servers
- C. Recovery Time Objective
- D. number of NDS servers

Correct Answer: AC
