100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by HP Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

What is an advantage of a core/edge topology?

- A. There is increased management for SAN capacity planning.
- B. It has performance characteristics suitable for tiering.
- C. Multiple backup processes can now run on one ISL.
- D. Fewer edge switches are used in this design thereby reducing the overall cost.

Correct Answer: B

QUESTION 2

A customer has an application with a single I/O stream. Data will be replicated over 100 km using DWDM between 2 Gbps SAN fabrics. From where does the most significant delay come?

- A. replication algorithm
- B. DWDM devices
- C. ISLs
- D. switch internal routing

Correct Answer: C

QUESTION 3

Who is responsible for the security in the SAN?

- A. LAN Security Manager
- B. SAN Configuration Manager
- C. SAN Change Manager
- D. SAN Security Manager

Correct Answer: D

QUESTION 4

On what is the design of the "Tree" SAN topology based?

- A. a fabric design that has switches that act as policy controllers for storage failover

- B. a fabric design that has one or more Fibre Channel switches acting as fabric backbones which dedicate all FC ports as ISLs
- C. a fabric design that has one or more Fibre Channel switches acting as the ISL trunk manager
- D. a fabric design that has one or more Fibre Channel switches acting as the Topology Configuration server

Correct Answer: B

QUESTION 5

What is a design property of the Core+Edge+Leaf SAN topology?

- A. It can start at one switch and grow almost without limit.
- B. It allows many devices to share a single ISL.
- C. It allows many hosts to share a single storage port.
- D. It involves simplex I/O, meaning only one path is utilized for I/O.

Correct Answer: A
