QUESTION 1

What is the most important security feature in any environment?

A. a secure area for the systems in the security domain

B. attitude and enforcement of the security policies

C. regular security audits

D. defined security policies for a defined security domain

Correct Answer: B

QUESTION 2

A customer has a mission-critical application based on a storage solution with replication on a pair of EVA arrays. Both the source and remote storage arrays must always be synchronized and in the event that a transaction cannot be committed the application should be halted. How must these arrays be set up?

A. Synchronized mode=enabled

B. Failsafe mode=enabled

C. Failsafe mode=disabled

D. Synchronized mode=disabled

Correct Answer: B

QUESTION 3

A SAN administrator has a dual fabric (Fabric-A and Fabric-B) NSPOF SAN with Windows hosts that are connected to an EVA storage subsystem. Each host has two HBAs and Secure Path. The administrator needs to move all the data traffic to Fabric-B. What are two recommended ways to accomplish this? (Choose two.)

A. power off all the switches in Fabric-A

B. disable all the switches in Fabric-A

C. disconnect the cables from the HBAs attached to Fabric-A

D. disable all the switch ports in Fabric-A attached the HBAs in the hosts

E. use Secure Path to move the LUN access to the required HBA

Correct Answer: DE

QUESTION 4

How long does it typically take to create a SAN architecture for an enterprise-class customer?

A. days to weeks

B. hours

C. weeks to months

D. months to years

Correct Answer: C

QUESTION 5

What are three characteristics of B-Series (Brocade) Fabric Manager? (Choose three.)

A. multiple switch management

B. single switch management

C. is embedded in the Brocade switch firmware

D. provides in-band management

E. is a separate software package

F. provides out-of-band management

Correct Answer: AEF
