QUESTION 1

What does a Recovery Time Objective (RTO) of three hours indicate as it relates to backup and restore?

- A. The amount of data lost with backups should not exceed three hours.
- B. Data is restored and the environment is operational within three hours.
- C. Data should be cloned and restored every three hours.
- D. The data should be fully backed up and restored every three hours.

Correct Answer: B

QUESTION 2

What are two security requirements that have evolved as SANs increase in size and are inter-networked over MAN/WANs? (Choose two.)

- A. administrator and user access control/authentication
- B. increased controls and granularity in SAN access and security policy distribution
- C. strong or binding authentication among SAN devices (switches and servers)
- D. increased privacy for sensitive management data such as passwords and files

Correct Answer: AB

QUESTION 3

How can you reduce Total Cost of Ownership (TCO) of a SAN?

- A. identify and address pain levels at upper management
- B. identify and address pain levels when reducing operating staff
- C. identify and address SAN islands in large corporations that will merge from smaller organizations
- D. identify and address pain levels associated with data movement, data sharing, and data growth

Correct Answer: D

QUESTION 4

What does a SAN high availability configuration provide?

- A. a non-disruptive merging of multiple SANs

- B. the capability to test new switch firmware in a production environment
- C. a non-disruptive upgrade process of the iSCSI protocol definitions
- D. non-disruptive SNMP messages to the system management framework

Correct Answer: A

QUESTION 5

SAN architecture is created at _____.

- A. the lowest level of storage abstraction
- B. the highest level of storage abstraction
- C. the mid level of storage abstraction
- D. the smallest LUN possible in the SAN

Correct Answer: B
