QUESTION 1

Which statement is true about storage virtualization using Continuous Access Storage Appliance (CASA) in a SAN?

A. It is a methodology used to increase employee productivity and to avoid unexpected overtime.

B. It provides a layer of abstraction of storage at the block level.

C. It provides seamless integration of block level data objects.

D. It allows an integrated, metadata description of a transparent storage box.

Correct Answer: B

QUESTION 2

What does a Recovery Time Objective (RTO) of three hours indicate as it relates to backup and restore?

A. The amount of data lost with backups should not exceed three hours.

B. Data is restored and the environment is operational within three hours.

C. Data should be cloned and restored every three hours.

D. The data should be fully backed up and restored every three hours.

Correct Answer: B

QUESTION 3

You have four 16-port switches in a small topology using the mesh configuration, with three ISLs going to each adjacent switch. What is the available number of user ports?

A. 61

B. 64

C. 40

D. 52

Correct Answer: D

QUESTION 4

What is SAN event management?

A. monitoring IP network resources through the same Ethernet infrastructure

B. monitoring external system events when a triggering condition occurs

C. monitoring storage resources to ensure availability per business requirements

D. monitoring the planning, acquisition, and optimal usage of SAN resources

Correct Answer: C

QUESTION 5

What are two benefits of migrating from one SAN topology to another SAN topology? (Choose two.)

A. The SAN can scale to support additional storage devices and applications servers.

B. Zone conflicts and limitations are resolved.

C. Many smaller switches are consolidated into fewer large fabric switches.

D. The management of the SAN is simplified.

Correct Answer: AC
