QUESTION 2

A storage administrator is running SAN monitoring software on a server other than the backup server. The software is interfering with scheduled backups in the company's tape library. Which action should the administrator take to minimize interference with the operation of the tape devices?

- A. Install the minimum patch-level support for the monitoring software.
- B. Enable the use of SCSI reserve and release.
- C. Modify the kernel tunable parameter vx_ninode.
- D. Implement single initiator zoning.

Correct Answer: D

Enable the use of SCSI reserve and release is for protection error human with tape, not interfering schedule backups with SAN monitoring SCSI reserve or release A device-level protection that is used by Enterprise Media Manager (EMM) to avoid unintended sharing of tape devices and possible data loss problems.

QUESTION 3

How do copy-on-first-write snapshots affect space consumption?

- A. The base volume is physically copied
- B. Snapshots are fully provisioned
- C. Snapshots without changes do not consume space
- D. Data is written twice after the snapshot

Correct Answer: C

QUESTION 4

A company needs to identify the WAN link requirements to replicate D2D systems across sites. Which tool does HP recommended to accomplish this task?

- A. HP Storage Sizing Tool
- B. HP Systems Insight Manager
- C. DNS Connection Check
- D. Data Storage Product Configurator

Correct Answer: A

QUESTION 5

A customer uses an HP Enterprise Backup Solution with the following network environment:

- Multiple storage systems
- Several server hosts
- Shared tape library

The server hosts run three operating systems:

- Windows Server 2008 R2
- Windows Server 2012
- Red Hat Enterprise Linux

In which directions does data flow between devices during a backup job? (Select two.)

- A.
from each storage system to the tape library
- B.
from the host to a replication site
- C.

from each the host to the tape library

D.

from the host to each storage system

E.

from each storage system to each host

F.

from each storage system to a replication site

Correct Answer: CE
