- A. Automatic master node assignment change
- B. RSCN event after zone set update
- C. Loss of port sync
- D. User directed Host Persona Change
- E. Node Reboot or spontaneous failure

Correct Answer: BD

When changing an existing host persona from 6 to 11, a host reboot is required for the change to take effect. This is an offline process. See "Configuring ESX/ESXi Multipathing for Round Robin via SATP PSP" (page 42) for the detailed procedure, as the host persona change should coincide with changing the SATP rules on the host as well.
