🞂 **800,000+** Satisfied Customers

QUESTION 1

What does the hp SAN philosophy recommend to address a wide range of storage system requirements?

A. Use enterprise class hardware and software throughout the datacenter

B. Use various components that have been sized accordingly

C. Build on HP best-in-class architecture with multi-vendor products

D. Use HP architecture to give the customer a better ROI

Correct Answer: B

QUESTION 2

Scenario

Following the merger of two financial companies, management is considering combining the two distinct customer call centers into a single physical location. In addition to the overall call center headcount increasing by 30%, the support for

two distinct customer bases presents the potential of having two different desktop PCs on the desk of each call center employee. Instead of correspondingly increasing IT support headcount to manage the single, larger call center and call

center infrastructure, management believes they can reduce the required time to support call center operations by 40% if they employ virtual desktop technology.

An initial assessment has identified the need for a centralized storage solution that could support 500 virtual desktops running a variety of applications that can scale quickly to accommodate an expected increase in call center staff. The

customer is already an HP Blade System customer using HP Virtual Connect Flex-10.

Some of the additional business criteria identified in customer planning interviews includes:

Use client virtualization for the desktops.

Achieve the highest possible density and performance for the virtual desktops,but keep the virtual desktop storage traffic off the network due to a current, existing limitation of only 1GbE.

Do not use standalone, network-attached storage.

Limit the impact of additional rack space.

Minimize the risk of additional help-desk tickets.

Present multiple solutions, prioritized with a recommendation.

Refer to the scenario.

Your proposed design includes a VMware View environment using HP storeVirtual 4800. What has to be considered when designing a solution?

A. Offer asynchronous replication to keep the virtual desktops up and running in case of a component failure.

B. Use VMware View provisioning servers outside the blade to minimize LAN traffic to the enclosure.

C. Avoid boot storms and insufficient response times during critical shift change hours.

D. Include HP virtual Connect FlexFabric to connect to the HP StoreVirtual environment.

Correct Answer: C

QUESTION 3

What is the maximum number of inter-switch links (ISLs) that can be used in an 8/20q Fibre Channel switched fabric?

A. 2

B. 4

C. 6

D. 8

Correct Answer: C

QUESTION 4

2Gb Switch 1Gb Switch 2Gb Switch 1Gb Switch In the configuration shown, how many SC to LC cables are required?

A. 1

B. 5

C. 3

D. 2

E. 4

Correct Answer: E

QUESTION 5

What is the maximum distance per cable segment using 50/125 micron multimode cable and short wavelength 2 Gb SFPs?

A. 300 m

B. 1 km

C. 500 m

D. 100 m

E. 200 m

Correct Answer: A
