100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by HP Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

A customer wants a new HP 3PAR StoreServ 7200 Storage System to maximize storage performance. What should the customer implement?

- A. quad controllers
- B. Adaptive Optimization
- C. 120 SSDs
- D. Dynamic Optimization

Correct Answer: B

The HP 3PAR Adaptive Optimization (AO) software takes optimization a step further into sub-LUN tiering. AO migrates sub-LUN data across CPGs based on user-defined policies. Two or three CPG tiers can be specified per policy; all

volumes inside a CPG are subject of an AO policy. AO policies usually operate on an FC and NL tier or on an SSD, FC, and NL tier.

This tool can improve system response and reduce disk acquisition cost by storing frequently accessed data in the faster tier while moving infrequently accessed data to the slower and cheaper slower tier.

Incorrect:

Not D: Related to online migration:

P 3PAR's Dynamic Optimization (DO) software offers the functionality of EVA's Dynamic LUN Migration: volumes are migrated online to another CPG with a different RAID level, set size, drive media type , etc.

QUESTION 2

A customer has several servers that use local physical storage and needs to design a solution to aggregate the storage into a single logical pool. The customer also needs to reduce complexity without investing in physical hardware. What should the customer include in the solution?

- A. HP Matrix Storage Provisioning Manager
- B. HP 3PAR StoreServ VSA
- C. HP Virtual Connect Enterprise Manager
- D. HP StoreVirtual VSA

Correct Answer: D

Combine the power of HP StoreVirtual VSA with Microsoft or VMware virtualization and get much more out of your virtualized environment. Turn a set of heterogeneous and disconnected physical disk drives in your servers and storage devices into a single pool of logical storage capacity.

Incorrect:

Not C: HP Virtual Connect Enterprise Manager (VCEM) centralizes connection management and workload mobility for HP BladeSystem servers that use Virtual Connect to access LANs, SANs and converged network infrastructures. VCEM

helps organizations increase productivity, respond faster to workload and configuration changes, and reduce operating costs.

QUESTION 3

A company needs a storage solution that provides four host bus adapter (HBA) slots and 64 GB of cache. Which HP storage solution meets these requirements?

- A. HP 3PAR StoreServ 7400
- B. HP StoreOnce 6200
- C. HP 3PAR StoreServ 7200
- D. HP StoreVirtual 4000

Correct Answer: A

HP 3PAR StoreServ 7400 4-node base with two 2U enclosures, four controller nodes, 64 GB cache, eight 8Gb/sec FC ports, four adapter slots, and 48 SFF drive bays.

Incorrect:

Not C: 3PAR StoreServ 7200 only has 32 GB cache.

QUESTION 4

A customer plans to implement an HP StoreOnce B6200 Backup System. The customer has two subnets that the backup system must utilize to communicate. What should be used to meet these requirements?

- A. DHCP for both subnets
- B. DHCP for one subnet and a static IP for the other
- C. a single network gateway for both subnets
- D. an IP address for each subnet

Correct Answer: C

The HP B6200 Backup System supports only one gateway for the whole cluster. Reference; HP B6200 Backup System Recommended Configuration Guidelines

QUESTION 5

A customer is migrating data from a third-party storage system to an HP 3PAR StoreServ 7000 Storage System. They want the new storage system to contain 480 disk drives at minimal cost.

- A. two HP 3PAR StoreServ 7200 storage systems
- B. one HP 3PAR StoreServ 7400 two-node storage system
- C. one HP 3PAR StoreServ 7400 four-node storage system
- D. one HP 3PAR StoreServ 7200 storage system

Correct Answer: C

HP 3PAR StoreServ 7400 Number of disk drives: 8-480 drives Number of controller nodes: 2 or 4

This model offers up to 4-node architecture with up to 480 drives (SSD, SAS, NL).

Incorrect: Not A, not D: HP 3PAR StoreServ 7200 Number of disk drives: 8-144 drives
