QUESTION 1

During an HP customer assessment workshop, the Alinean report shown in the exhibit is created. Which cost saving should you highlight in your presentation when positioning the value of HP 3PAR StoreServ Thin Technologies?

Three year TCO Current (As-Is) Vs. New HP 3PAR New HP 3PAR		Details	Existing	HP - 3PAR	Alternate Solution	Savings: HP 3PAR Vs. Existing
<input checked="" type="checkbox"/>	Hardware Cost	Details	16.527€	54.749€	110.110€	(38.222€)
<input checked="" type="checkbox"/>	Software Cost	Details	115.387€	23.690€	33.242€	91.696€
<input checked="" type="checkbox"/>	Service and Support Cost	Details	434.403€	22.746€	40.263€	411.656€
<input checked="" type="checkbox"/>	Total Capacity Cost	Details	248.215€	72.613€	101.187€	175.602€
<input checked="" type="checkbox"/>	Incremental Infrastructure Cost	Details	7.323€	0€	7.323€	7.323€
<input checked="" type="checkbox"/>	Storage Administration and Management Cost	Details	211.132€	21.113€	116.123€	190.019€
<input checked="" type="checkbox"/>	Other Services (Professional, Consulting etc.)	Details	0€	0€	0€	0€
<input checked="" type="checkbox"/>	Power and Cooling Costs	Details	63.118€	20.300€	65.464€	42.817€
<input checked="" type="checkbox"/>	Data Centre Floor Space Cost	Details	10.328€	1.661€	3.477€	8.667€
<input checked="" type="checkbox"/>	Implementation Cost	Details	0€	8.534€	11.933€	(8.534€)
<input checked="" type="checkbox"/>	Cost Of Unplanned Downtime (High Availability)	Details	81.282€	837€	40.641€	80.445€
<input checked="" type="checkbox"/>	Cost Of Planned Downtime (Maintenance, Upgrades)	Details	29.767€	0€	29.767€	29.767€
<input checked="" type="checkbox"/>	Time To Solution (PO, Create New Environments)	Details	26.801€	3.350€	20.101€	23.451€
<input checked="" type="checkbox"/>	Application Integration (e.g. VMware, Oracle...)	Details	28.605€	22.884€	25.744€	5.721€
Total			1,272,886€	252,479€	605,373€	1,020,406€

- A. Planned downtime
- B. Unplanned downtime
- C. Application integration
- D. Power and cooling

Correct Answer: A

QUESTION 2

Refer to the scenario.

A university provides liberal arts training to 2,500 students in 68 classrooms and provides a growing suite of IT services that encompass dorm rooms and classrooms. All 2,500 students are provisioned an HP EliteBook Tablet PC to access

these services. Students use these tablet PCs for taking notes, handling documents, communicating with each other and with instructors, and participating in distance-education classes.

Additionally, by using their tablet PCs as thin clients, science and engineering students leverage virtual desktop infrastructure (VDI) and HP Remote Graphics Software to access applications that run on high-powered HP blade servers. All 68

classrooms are multi-media equipped, enabling instructors to record lectures for the college's closed circuit TV system. The university has implemented enterprise content management (ECM) applications, including Microsoft SharePoint for document imaging and workflow for staff and faculty, as well as for external accrediting bodies.

Additionally, a recent initiative to implement voice-over-IP telephone communications on campus has started.

The compute environment is based on VMware vSphere using HP BL460c and BL680c G7 server blades in c7000

enclosures within two data centers.

The university needs to develop computing solutions to address the following problems and current initiatives:

- The current backup-to-tape environment creates downtime for backups of 6 to 12 hours.
- Each incoming class of 600 floods the registration system within the first hours after it opens. The server and network gridlock caused by this high workload prolongs the registration process by as much as one hour per student.
- Proof of concept is necessary for distance education involving large volumes of video and major bandwidth requirements.
- Top tier data must be replicated between two data centers over a 10 Gbps network Disaster recovery has a recovery time objective (RTO) of 120 minutes and network utilization should be minimized.
- Seven TB of first tier data needs to be migrated from the current fibre channel storage solution to nearline storage.
- Second tier data requires deployment of a separate storage solution. The university's top four IT improvements goals are as follows:
 - Provide a robust replication capability between data centers.
 - Reduce server downtime with faster backups.
 - Retain more backup data in smaller disk space.
 - Increase efficiency, reliability, and ease of system administration. Moreover the college's top three business benefit goals are as follows:
 - Reduce student registration time.
 - Increase number of servers while minimizing the need for additional staff to support them.
 - Utilize IT resources and staff as efficiently as possible.

The company has asked that you create multiple solution proposals and prioritize one when you return for a presentation.

Which HP 3PAR Storage technology will allow the customer to automatically migrate data between different disk types to meet one of the stated business goals?

- A. Autonomic Rebalance
- B. Dynamic Optimization
- C. Peer Motion
- D. Adaptive Optimization

Correct Answer: D

QUESTION 3

A retail customer has primary data centers, distribution centers, and retail stores. The retail locations are smaller sites that have less than 2 TB of data that need to be highly available. Each location is consolidating between six and twelve

physical servers into a virtual cluster running on two HP ProLiant DL380 Gen8 servers.

The customer needs a low-cost storage solution that they can use at each retail location and can scale using similar technology for the distribution centers. The solution also needs to integrate with VMware and provide future replication with no additional cost.

Which HP Storage solution should you recommend?

- A. HP EVA
- B. HP 3PAR StoreServ
- C. HP StoreVirtual
- D. HP MSA

Correct Answer: D

QUESTION 4

You are reviewing a colleague's extended fabric design, which proposes an HP 1606 Extension SAN Switch.

Which customer requirement should lead you to choose an HP Multi-protocol Router Blade for the B-Series as an alternative?

- A. Requirement to extend the fabric between sites
- B. Concerns around fabric stability
- C. Requirement to support dark fiber metro connectivity
- D. Need for up to 10 Gbs replication bandwidth

Correct Answer: A

QUESTION 5

A large telecom company specializing in mobile services has experienced rapid growth. The year to year growth between 2003 and 2012 was approximately 15%. The proposed critical solution needs to work with the existing application modules and deliver a maximum data transfer capacity of 120TB. The solution has to offer Total Cost of Ownership (TCO) over the next 5 years. Which critical backup solution and support level should you propose? Select two.

- A. HP Same day hardware support
- B. HP StoreOnce 4430 with two upgrade kits
- C. HP 6 HOUR CALL to repair support
- D. HP StoreOnce B6200 with three 48 expansion kits
- E. HP 24/7 4 hour response support
