QUESTION 1

A Microsoft Windows customer wants to add a file server presence to several existing and future remote sites. Redundancy, ease of management and hot swap storage growth capabilities beyond 32TB are required.

The solution must support iSCSI, FTP, and WebDAV for each site. Footprint and cost are concerns. What is the best solution?

- A. X5000 running Windows Storage Server, D2700 enclosure
- B. Four SL230p Gen8 nodes running Windows 2008 R2, SL6500 and ILO advanced licensing
- C. Two DL360p Gen8 servers running Windows Storage Server and a D2600 enclosure
- D. C7000, four BL460c Gen8 blades running Windows 2008 x64 and an MDS600

Correct Answer: A

QUESTION 3

Which HP SIM feature allows you to perform a Virtual Connect Profile movement from a failed server to a spare machine after the failure was discovered?

- A. Insight Control virtual management functionality
- B. Automatic event handling and custom commands
- C. Remote Task Execution based on SSH
- D. vCenter Server and HP SIM integration

Correct Answer: B

<http://h20000.www2.hp.com/bc/docs/support/SupportManual/c02048561/c02048561.pdf> (pag 59)

Initiating VC Profile Failover using HP SIM Automatic Event Handling The VCEM custom tools enable an administrator to initiate a VC Profile Failover using automatic event handling. Any administrator with full permissions within HP SIM or VCEM can perform VC Profile Failover operations. The VCEM custom tools can be deleted from the HP SIM or VCEM installation with no impact to other operations.

QUESTION 4

A customer has an HP 10642 G2 Rack with Multiple DL2000 servers. The power connection to the rack is by two full length 7.36 kVA 32A single phase international PDUs with SNMP management module installed. As shown in the exhibit, the DL 170e servers in the DL2000 chassis are being blocked in by the PDU.

What can be done to allow the DL 170e to be removed for servicing?

- A. Replace the Existing PDUs with full length, 11kVA 16A 3Phase PDUs.
- B. Replace the existing PDUs with a modular PDU solution.
- C. Replace the existing PDUs with an iPDU Solution.
- D. Mount the existing PDUs upside and feed the power from the top of the rack.

Correct Answer: C

QUESTION 5

You want to add a new network to the existing VC domain managed through VCEM. When you try to access VCM, you get a message that the VC domain configuration is not available from the VCM module and should be performed from the

VCEM level. You cannot locate an option in VCEM to add/modify vNet settings.

What should you do?

- A. Put the domain into the maintenance mode using the VCEM and modify the configuration using VCM.

- B. Log into HP SIM using the account with the CMS full configuration rights and modify the VC settings using VCEM.
- C. Use the RBCL scripts and VC CLI to add/modify vNet.
- D. Use the Virtual Connect Support Utility to modify domain settings.

Correct Answer: B
