QUESTION 1

Which HP Gen8 technologies are required for Dynamic Power Capping at the rack level? (Select two)

- A. new racks with location awareness integrated into the rack
- B. Insight Control v7.1 or higher
- C. ILO v3 or newer
- D. Gen8 platinum power supplies
- E. Intelligent PDU (iPDU)

Correct Answer: DE

QUESTION 2

A customer complained of slow performance on an HP ProLiant server. You upgraded to faster processes and added memory to the server. What should you create after you change the server hardware configuration?

- A. New performance baseline
- B. Insight Diagnostics report
- C. CPU Stress report
- D. Memory Validation report

Correct Answer: A

QUESTION 3

Which must be installed on the target server P2P migration?

- A. HP Insight Dynamics ProLiant
- B. HP Insight Control
- C. HP iLO Advanced for BladeSystem
- D. HP Insight Control server deployment

Correct Answer: B

QUESTION 4

Which Windows performance Monitor counter indicates that a network bottlenecks is occurring?

- A. Network Interface: Output Queue Length
- B. Network Interface: Current Bandwidth
- C. Network Interface: Packets Sent/Sec
- D. Network Interface: Packets Received/Sec

Correct Answer: A

QUESTION 5

You are upgrading the iLO 4 firmware and the flash fails. What is the next step?

- A. Retry the flash before rebooting the server or iLO.
- B. ~~to reboot so that you can revert to the original version.~~
- C. Pull the power cord to abort upgrade and revert to the original version.
- D. Reboot the server and re-enter the iLO update to force the update.

Correct Answer: A

If this error occurs, click the Clear Error button to reset the flash process, and then try the firmware update again with the correct firmware file. If you do not clear the error, the same error might occur even when you use the correct firmware file.
