QUESTION 1

Which exhibit shows the better Open Shortest Path First (OSPF) area scheme and for which reason?

- A. Exhibit 1 because it allows the application of access control lists (ACLs) between users and the data center
- B. Exhibit 1 because the campus and data are separate areas
- C. Exhibit 2 because every area has similar numbers of routers
- D. Exhibit 1 because every area has fewer than 50 routers
- E. Exhibit 2 because every area has fewer than 35 routers

Correct Answer: B

QUESTION 2

Organizations can deploy off-the-shelf, virtualized application on some HP infrastructure devices. Which devices support this capability? (Select two)

- A. HP MSR3000 Routers
- B. HP HSR6800 Routers
- C. HP 7500 Switches
- D. HP 11900 Switches
- E. HP 5400 zl Switches

Correct Answer: AE

QUESTION 3

A network architect is designing a redundancy solution for a customer and has learned that there is a single link between two critical network components. During the past 4000 hours of operation, the link has failed twice. The customer estimates that each failure has taken two hours to resolve.

Given this information, what is the availability that this link currently provides?

- A. Less than 99.99%

- B. 99.9%
- C. 99.99%
- D. 99.999%

Correct Answer: B

QUESTION 4

What are information technology Service Management (ITSM) framework, such as the infrastructure Technology Infrastructure Library (ITILv3) and The Open Group Architecture Framework (TOGAF)?

- A. They are Internet Engineering Task Force (IETF) standards that provide evolving guidelines and best practices for IT design and management
- B. They are high-level approaches that provide recommendations and best practices for IT design management
- C. They are industry-wide standards that provide guidelines for enterprise design and management
- D. They are Internet Engineering Task Force (IETF) standards that define proper network design

Correct Answer: B
