-  **800,000+** Satisfied Customers

QUESTION 1

A customer has an HP 3PAR StoreServ 7200 with SSD and SAS drives only. The customer wants to add a shelf with NL drives to implement a tiering solution for infrequently used data. According to HP best practices, which configuration will help the customer achieve the best protection in this environment?

- A. drives in RAID 6
- B. drives in RAID 5
- C. 12 drives in RAID 5
- D. 12 drives in RAID 6

Correct Answer: D

QUESTION 2

What is an advantage of Cache persistence?

- A. It eliminates the performance penalties associated with traditional arrays and Write-through mode by maintaining required service levels even in the event of a controller-node failure or upgrade
- B. It increases performance and resilience because it is automatically enabled during bus; workloads
- C. It ensures that when a controller node is placed into Cache Write-through mode, the node will dynamically form a mirrored cache relationship with another storage controller node
- D. In the event of a partner-node failure, it allows a node to mirror the write data to all nodes that do not have direct access to the drives

Correct Answer: A
