QUESTION 2

You are discussing solutions with a customer who wants to use Peer Motion on the HP 3PAR StoreServ 7400. The customer inquires about the specific requirements and limitations of this solution. What should you tell them to consider?

A. A maximum of 150 Peer Motion migration tasks can be created by PMM, but only nine of them run in parallel; the task moves region by region.

B. The destination array requires two free FC ports for Peer Motion: one port in peer mode to connect to the source array and one to connect to the host that owns the VLUNs that will be migrated.

C. Volumes in a 3PAR domain on the source array will be placed in the same domain on the destination array

D. Peer Motion acts as a host-based volume-mirroring solution and requires a license installed on the source and on the destination array.

Correct Answer: B

QUESTION 3

You are using SPMAINT for a firmware update process. Which statement is correct about this scenario?

A. SPMAINT offers maintenance tools and processes for the Service Processor and not the InServ Storage Server,

B. SPMAINT offers maintenance tools and processes for the InServ Storage Server and not the Service Processor.

C. SPMAINT is used for configuration and maintenance of the Service Processor and not for any firmware upgrades.

D. SPMAINT is the primary interface for the support of both the InServ Storage Server and its Service Processor

Correct Answer: D
