QUESTION 1

What are the core differentiators for HP ALM? (Select three.)

- A. Service Intelligence built on Run-time Service Model
- B. Business-IT and higher quality with complete traceability out of the box
- C. Highest quality: single platform quality, performance, and security
- D. Automated business service monitoring with universal event correlation
- E. Enterprise scale and high availability F. Proven lower TCO: mature, open, and extensible

Correct Answer: ADF

QUESTION 2

How does HP Service Virtualization solve the problem of services being unavailable, having restricted access, and/or being costly to use during the testing phase?

- A. It implements HP Matrix with a hypervisor.
- B. It uses scripts to simulate the user experience.
- C. It provides a professional service that writes stubs to replace the unavailable services.
- D. It learns and simulates the services.

Correct Answer: B

QUESTION 3

What are the differentiators for HP Performance Center? (Select three.)

- A. requirements definition and management capabilities
- B. advanced analysis, monitoring, and diagnostics to identify and diagnose bottlenecks
- C. faster and simplified end-to-end performance lifecycle with a lower total cost of ownership
- D. market leading support for legacy, as well as emerging applications and protocols
- E. enterprise application delivery through multi-methodology process and integrated developer environment support
- F. test planning, scheduling, execution, and reporting across concurrent projects and multiple people

Correct Answer: DEF

QUESTION 4

What are the key business and IT challenges faced by application delivery organizations with respect to quality management? (Select three.)

- A. improvement of time to market
- B. disaster recovery and availability
- C. difficulty in managing heterogeneous environments
- D. mitigate risk
- E. elimination of rework and cost across the enterprise
- F. rapidly-growing cloud adoption and virtualization

Correct Answer: CDE

QUESTION 5

Why is enterprise release planning and tracking so important for today's business processes?

- A. because mobile computing is growing rapidly and must be managed effectively
- B. because businesses need to enforce standardization and compliance
- C. because of budget constraints
- D. because business initiatives cross multiple applications

Correct Answer: B
