#### QUESTION 4

Which statement best describes the capabilities of HP Software Security Center as they relate to the HP ALM Solution?

A. Secure ALM increases development productivity by automatically identifying and resolving security defects in production environments using Static Application Security Testing technology to reduce the total cost of security in production.

B. HP's Software Security Center solutions are integrated into BSM to promote a customer centric business focused

approach to security management.

C. HP's approach to ALM security automates and correlates dynamic, static, and runtime test results into discrete defect tracking information with actionable results.

D. HP's approach to ALM security provides a high-level view of risk management metrics for improved business decision making.

Correct Answer: B

---

#### QUESTION 5

Which business challenges are relevant to requirements management? (Select three.)

A. Forty percent of project budgets are wasted due to poor requirements.

B. There is a lack of visibility and traceability throughout application lifecycle.

C. The VP of Apps needs a way to visualize the state of application quality.

D. There is no single system of record for requirements definition and management. Business analysts need a way to prototype my applications.

E. Development is not linked into the application lifecycle.

Correct Answer: ABC
