- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

What are the principles of unified requirements management? (Select four.)

- A. Run-time Service Model capturing standardization
- B. Universal event correlation
- C. Linking
- D. Collaboration
- E. Application sensitive storage management

Correct Answer: ABCD

QUESTION 2

What is the key business challenge that drives the need for tight and real-time control over the application development, test, and release cycle?

- A. Businesses require up-to-date information regarding intellectual property and attrition.
- B. Ongoing business events, such as MandA and creation of new lines of business, highlight the inadequacy of a one-time portfolio assessment or limited project management processes.
- C. An agile and modern world requires modernized and fast applications.
- D. Mobile computing is growing rapidly and must be managed effectively.

Correct Answer: B

QUESTION 3

Which statement is based on initial customer case studies to describe the benefits of HP ALM?

- A. This latest solution is an excellent example of HP understanding our business goal of being more efficient and flexible and delivering exactly the right adaptive infrastructure to accomplish it.
- B. HP helped us optimize our current production plan and improve resource utilization, giving us better yield. We are now in a better position to provide estimated commitment to future orders because our production is near real-time, based on actual movement within the production line.
- C. HP ALM accelerates application transformation by empowering applications teams to plan, build, and deliver modernized applications to operations up to two times faster with optimized quality.
- D. Implementing HP Application and Performance Management Software for Composite Application Management and HP Real User Monitor has increased the transaction success rate by 10% and application performance by 5%.

Correct Answer: C

QUESTION 4

Which statement best describes the licensing model used in HP ALM security solutions?

- A. HP Software Security Center solutions use a "High-water mark of past use" license model where usage fees are calculated based on the maximum number of concurrent users in a defined past time period (typically monthly).
- B. All HP Software Security Center solutions are server-based and use a concurrent user network licensing model.
- C. HP Software Security Center solutions support a variety of flexible licensing options, including single "named" user, node-locked and concurrent "floating" user licenses, which are valid for a fixed period and annually renewable.

D. HP Software Security Center solutions use pay-per-use license fees and are based on actual usage.

Correct Answer: B

QUESTION 5

What are the specific capabilities of HP Systinet that enable application governance and policy management? (Select three.)

- A. Configuration lockdown
- B. Dynamic discovery and configuration management
- C. Governance lifecycle and policy management
- D. System availability and performance monitoring
- E. EA repository
- F. Contract management

Correct Answer: ABC
