QUESTION 1

A customer has placed a service call because RAID 6 cannot be configured on a Smart Array P420i controller using 4 disk drives. What is the most likely cause of the problem?

- A. The customer needs a minimum of 6 disk drives to support RAID 6.
- B. The battery backed cache option is not installed.
- C. The P420i Smart Array Controller is defective.
- D. The P420i Smart Array Controller does not support RAID 6.

Correct Answer: B

HP Smart Array Controller requirements - minimum of:

*

HP Smart Array P212, P410, P410i, or P411 controller 256MB Cache Module

*

Battery Kit for Battery Backed Write Cache (BBWC)

*

1 or 2 GB Flash Back Write Cache module (FBWC)

*

1 SSD/HDD physical SDD that will be 100% dedicated to caching. Any Gen8 supported HDD(s) and SSD (s)

*

An updated version of the Array Configuration Utility (ACU) to configure HP SmartCache

Note:

*

RAID 6 (Advanced Data Guarding)

Incorrect:

Not A: RAID 6 extends RAID 5 by adding an additional parity block; thus it uses block-level striping with twoparity blocks distributed across all member disks.

QUESTION 2

What does differential backup do?

- A. backs up files since the last full backup, but does not reset the archive bit

- B. backs up all files
- C. copies all files that were changed since the last incremental backup
- D. copies all files changed after the last backup and resets the archive bit

Correct Answer: A

A differential backup is a cumulative backup of all changes made since the last full backup, i.e., the differences since the last full backup. The advantage to this is the quicker recovery time, requiring only a full backup and the last differential backup to restore the entire data repository. The disadvantage is that for each day elapsed since the last full backup, more data needs to be backed up, especially if a significant proportion of the data has changed, thus increasing backup time as compared to the incremental backup method.

QUESTION 3

Which statement is correct about upgrading ProLiant components?

- A. For DL380p G8, you can populate up to 24 UDIMM memories.
- B. Upgrade the server BIOS and firmware before upgrading the CPU.
- C. RDIMMs and UDIMMs memory can be mixed as long they are on different memory channels.
- D. When installing RDIMM memory, you can populate all 24 slots with both processors installed.

Correct Answer: D

*

DIMM Slots Available: 24

*

Maximum Capacity (RDIMM): 384GB (24 x 8GB UDIMM @1600MHz)

*

(not A) Maximum Capacity (UDIMM): 128GB (16 x 8GB UDIMM @1600MHz)

QUESTION 4

Which tool provides the most inclusive information about a server?

- A. insight Diagnostics online survey
- B. OS and application logs
- C. Insight Diagnostics offline survey
- D. HPS Report

Correct Answer: C

Note:

*

HP Insight Diagnostics is a proactive server management tool, available in both Online and Offline editions. Insight Diagnostics provides diagnostics and troubleshooting capabilities to assist IT administrators who verify server installations, troubleshoot problems, and perform repair validation.

*

HP Insight Diagnostics contains the following primary tabs: Survey Diagnose Test (available in Offline Edition only)
Status Log Help

QUESTION 5

Where can the server PSP be chosen for version comparison and updates?

- A. VCEM
- B. SIM VCRM
- C. SMH
- D. VCA

Correct Answer: D

The Version Control Agent (VCA) is an HP Insight Management Agents that is installed on a server to enable you to see the HP software and firmware that is installed on that server.

Note:

* ProLiant Support Packs (PSP) represent operating system (OS) specific bundles of optimized drivers, utilities, and management agents. These bundles are tested together to ensure proper installation and functionality. PSPs are released concurrently with HP's SmartStart, and can also be released outside of the SmartStart cycle and made available on the HP ProLiant Support Pack download selection pages or at HP Insight Foundation website.
