**QUESTION 1**

Which statement describes an advantage of dynamic routing?

- A. Dynamic routing provides DNS services along with IP connectivity, whereas static routing does not.
- B. Dynamic routing is typically more scalable when compared to static routing.
- C. Unlike static routing, dynamic routing provides redundant IP addresses for end-user devices.
- D. Unlike static routing, dynamic routing requires no initial user configuration

Correct Answer: C

QUESTION 2

Which statements are true regarding applications? (Select two)

- A. Applications can evade traditional security mechanisms by tunneling within other commonly used services (e.g., http, https).
- B. Applications do not pose a threat to network security.
- C. Applications can evade traditional security mechanisms by randomly shifting their communications ports and protocols.
- D. TippingPoint only inspects some applications.
- E. TippingPoint does not inspect applications.
- F. Applications pose a minimal threat to network security

Correct Answer: CDF

QUESTION 3

Sets of firewall ports in a Bridge configuration are an example of which mode configuration?

- A. Unified
- B. Transparent
- C. Integrated
- D. Routed

Correct Answer: A

QUESTION 4

How often are digital vaccines released? (Select two.)

- A. Yearly
- B. Daily
- C. Immediately for critical vulnerabilities and threats (ZDI)
- D. Monthly
- E. Bi-annually to meet the needs of users and address critical threats
- F. Weekly

Correct Answer: CF

QUESTION 5

Refer to the exhibit.

	<input type="checkbox"/>	ID	State	Source Zone	Action	Destination Zone	Services
1	<input type="checkbox"/>	Product...	Enabled	Internal Marketing	Permit + Notify	Perimeter Marketing	http ms-sql sip https smtp
	<input type="checkbox"/>	Default...	Enabled	any	Block	any	any

Which traffic is permitted to the Internal zone without any firewall rules configured?

- A. All HTTP traffic input to the Internal zone is permitted.
- B. Any IP traffic input to the Internal zone destined to any other interfaces is permitted.
- C. Any IP traffic input to the Internal zone is permitted.
- D. Some of the IP traffic input to the Internal zone is permitted.

Correct Answer: C
