### QUESTION 1

Which Security Zone Property identifies members so that you can apply policies to them?

- A. TCP-RST
- B. Inspection Policies
- C. Named Resources
- D. Inspection Profiles

Correct Answer: C

### QUESTION 2

Refer to the exhibit.

The exhibit shows a configuration interface for NAT/PAT. It is divided into three sections:

- Source conditions:** A dropdown menu is set to "Address Group", followed by an equals sign (=) and another dropdown menu set to "Web\_farm".
- Destination conditions:** A dropdown menu is set to "Security Zone", followed by an equals sign (=) and another dropdown menu set to "Marketing".
- Translate source address to \*:** There are two radio button options: "Address of Egress interface" (which is unselected) and "Address \*" (which is selected). Below the "Address \*" option is a text input field containing the IP address "172.22.15.21".

Which statement is true regarding the NAT/PAT configuration?

- A. Dynamic NAT is used for any traffic that is sourced from the Web\_farm to the Marketing zone.
- B. Static NAT is used for any traffic that is sourced from the Web\_farm to the Marketing zone.
- C. Dynamic PAT is used for any traffic that is sourced from any host in the Web\_farm network to the Marketing Security zone.

D. Dynamic PAT is used for any traffic that is sourced from the Web\_farm to the outside.

Correct Answer: B

---

### QUESTION 3

Which CLI command can be used to show how much traffic is entering the inspection engine from all segments?

- A. show np tier-stats
- B. show np statistics
- C. show np details
- D. show np traffic

Correct Answer: A

---

### QUESTION 4
