QUESTION 1

A network administrator has an HP Comware switch that is configured with OSPF. The network administrator views the routing table and sees that a default route was learned from an OSPF neighbor (10.1.1.1). However, the network administrator wants to override this action and use a different neighbor (10.1.1.2) for the default route.

The network administrator configures this command:

[Comware] ip route-static 0.0.0.0 0 10.1.1.2

After configuring the command, the network administrator examines the routing table and notices that the original neighbor\\'s default route is still in the routing table, but the static route is missing.

What is the cause of this problem?

- A. OSPF routes have a lower precedence value
- B. The ip default-gateway command must be used when creating a default route
- C. Only one routing protocol can be operational on a Comware device
- D. The static route has a syntax mistake

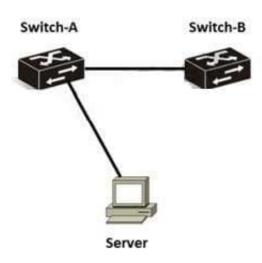

Correct Answer: A

QUESTION 2

Present

Future

A network administrator has a server with a single link to the network. The company is concerned about redundancy and wants to implement a solution like that shown in the right-hand side of the diagram.

Which solution meets the company\\'s needs?

- A. HP Comware or HP ProVision switches using IRF
- B. HP Comware switches using IRF only
- C. HP Comware switches using meshed IRF or meshed stacking
- D. HP Comware switches using distributed trunking only
- E. HP Comware switches using distributed trunking or IRF

Correct Answer: B

QUESTION 3

Which management protocol is enabled, by default, on HP Provision switches?
A. Syslog
B. SSH
C. SNMP
D. NTP
Correct Answer: B
QUESTION 4
A network administrator is building two IRF domains:
-
One domain for the two distribution layer switches
-
One domain for the access layer switches
Each access layer switch should have a connection to each distribution layer switch. In this design, how many access switches can the administrator have in the access layer IRF domain before spanning tree is required to remove loops between the two IRF domains?
A. 2
B. 4
C. 6
D. 8
E. 12
Correct Answer: A
QUESTION 5
Refer to the exhibit.

ProVision# copy config configl config config2 Unable to copy configuration to "config2" ProVision#

A network administrator is managing the configuration files on an HP Provision switch and executes the commands shown in the exhibit. What is the probable cause of the error message when the network administrator tries to copy the file?

- A. The flash memory in the switch is full and supports no more files.
- B. The copy command should only be used to manage operating systems.
- C. No empty configuration memory slots exist on the switch.
- D. The copy command contains a syntax error.

Correct Answer: C
