QUESTION 1

Sentence-templates can be used to document natural language requirements. You want to introduce such a sentence-template in your project and must convince your project manager of its advantages. Which two arguments do most likely put forward in this discussion? (2 Points)

- A. High quality requirements are guaranteed already from the initial documentation.
- B. Requirements that are formulated according to the sentence-template contain no linguistic transformation effects.
- C. Drafting requirements in accordance with sentence-templates can be learned in a short time.
- D. The use of a sentence-template basically delivers greater information content.
- E. A requirement drafted according to a sentence-template satisfies all quality criteria for requirements.

Correct Answer: AB

QUESTION 2

For an interview, you have prepared a use case diagram for the system to be specified. You decide to talk through a use case in detail with the stakeholder. You receive very useful feedback which must now be documented. Which of the following means of expression is least suitable to document the details of a single use case? (1 Point)

- A. State diagram
- B. Activity diagram
- C. Natural language
- D. Context diagram
- E. Class diagram

Correct Answer: D

QUESTION 3

As part of the "UniKasso" project, the "CRETIL" company is standardising the payment methods for all customers. The requirements specification has been created and the first release is currently being implemented. This week, the management has decided to include the implementation of the "credit card" mode of payment in the first release and to shift the "direct debit" mode of payment to the second release. The test manager receives the order to adjust the test planning accordingly. Which particular characteristic of the requirements will facilitate the work of the test manager significantly in this respect? (1 Point)

- A. Coherence
- B. Testability
- C. Flexibility

D. Stability

E. Traceability

Correct Answer: E

QUESTION 4

The following state diagram is to be found in a requirements specification for an order management system. Which of the following requirements is consistent with the diagram and which are not? (2 Points)

Consistent	Not consistent	
A	B	An invoice may only be issued after the products listed on it have been dispatched.
C	D	A product that is not in stock is sent directly by the supplier.
E	F	Every order results in at least one invoice.
G	H	All products ordered are delivered, except if they are discontinued by the supplier.

A. A, D, F, G

Correct Answer: A

QUESTION 5

Starting from an informal and unstructured description of the facts, semiformal description techniques attempt to take a step in the direction of formality, for example to prevent misunderstandings. One of the semiformal description techniques is the sentence-template. What is the most precise definition of a sentence-template as used for requirements? (1 Point)

A. A sentence-template is a blueprint for a requirement.

B. A sentence-template is a blueprint for the semantic filling of the individual requirement elements.

C. A sentence-template is a blueprint for the syntax and semantics of a requirement.

D. A sentence-template is a blueprint for the syntactical structure of an individual requirement.

Correct Answer: D
