QUESTION 1

Which characteristics BEST describe a walkthrough?

A. Documented, includes peers and experts

B. Formal process collects metrics

C. Defined roles, led by trained moderator

D. Led by the author, may be documented

Correct Answer: D

QUESTION 2

Which of the following defects would NORMALLY be identified by a static analysis tool?

A. The response time for the search function exceeded the agreed limit

B. The design specification had many grammatical errors

C. The component code had variables that were used but had not been declaredThe component? code had variables that were used but had not been declared

D. The component was found to be the source of the memory leak

Correct Answer: C

QUESTION 3

A system under development contains complex calculations and decision logic, and it is assessed as high risk because of the relative inexperience of the development team in the application domain. Which of the following would be the MOST appropriate choice of test design technique for component testing?

A. Decision testing.

B. Statement testing

C. State transition testing

D. Equivalence partitioning

Correct Answer: A

QUESTION 4

If a system has been tested and only a few defects have been found, what can we conclude about the state of the system?

a) The system may be defect free but the testing done cannot guarantee that this is true.

b) The system is defect free and further testing would therefore be a waste of resources.

c) It depends what the system is designed to do.

d) Further testing should be considered but this should be focussed on areas of highest risk because it would not be possible to test everything.

e) Testing should be curtailed because it is yielding no value.

A. a, c and d

B. b, c and d

C. a, d and e

D. b, c and e

Correct Answer: A

QUESTION 5

Which of the following statements about black box and white box techniques is correct?

A. Decision Testing, Equivalence Partitioning and Condition Coverage are all black box techniques

B. Decision Table Testing, State Transition and Use Case Testing are all black box techniques

C. Decision Testing, Equivalence Partitioning and Statement Testing are all white box techniques

D. Boundary Value Analysis, State Transition and Statement Testing are all white box techniques

Correct Answer: B
