QUESTION 1

Which two statements are true about IPsec traffic? (Choose two.)

- A. IPsec traffic can be forwarded when no IKE SA is present.
- B. IPsec traffic can be forwarded when no IPsec SA is present.
- C. For traffic that has to be encrypted, the security policy must be crafted based on the IP addresses in the inner IP header of the final ESP packet.
- D. For traffic that has to be encrypted, the security policy must be crafted based on the IP addresses in the outer IP header of the final ESP packet.

Correct Answer: AC

QUESTION 2

You must create a security policy for a custom application that requires a longer session timeout than the default application offers.

Which two actions are valid? (Choose two.)

- A. Set the timeout value in the security forwarding-options section of the CLI.
- B. Set the timeout value for the application in the security zone configuration.
- C. Alter a built-in application and set the timeout value under the application-protocol section of the CLI.
- D. Create a custom application and set the timeout value under the application-protocol section of the CLI.

Correct Answer: CD

QUESTION 3

Referring to the exhibit, you have just committed the UTM antivirus configuration. You notice that the SRX Series device shows that Kaspersky scanning is being used instead of express scanning.

What must you do to resolve this problem?

- A. You must configure the antivirus type to use express scanning
- B. You must configure the antivirus type to disable Kaspersky
- C. You must update the antivirus signatures
- D. You must wait until the next pattern update

Correct Answer: A

QUESTION 4

What is a zone?

- A. a set of rules that controls traffic from a specified source to a specified destination using a specified service
- B. a collection of one or more network segments sharing identical security requirements
- C. a method of providing a secure connection across a network
- D. a tool to protect against DoS attacks

Correct Answer: B

QUESTION 5

Which three elements are contained in a session-close log message? (Choose three.)

- A. source IP address
- B. DSCP value
- C. number of packets transferred
- D. policy name
- E. MAC address

Correct Answer: ACD
