QUESTION 1

You want to create a Host Checker policy that prevents a user with an Apple iOS device from connecting to the network if the device limitations imposed by Apple have been altered or removed. Which Host Checker rule type in the Admin UI should you create?

- A. Predefined Rule. Mobile Security Suite (MSS)
- B. Predefined Rule. Rooting Detection
- C. Predefined Rule. Jail Breaking Detection
- D. Predefined Rule. Check Operating System

Correct Answer: C

QUESTION 2

A customer requires licensing to support a total of 1,000 concurrent users for a new Junos Pulse Secure Access Service cluster deployment consisting of two nodes. The Junos Pulse Secure Access Service will run software release 7.2. What is the minimum license configuration needed to support this requirement?

- A. one 500-user ADD on the first node and one 500-user CL license on the second node
- B. one 1000-user ADD on the first node and one 500-user CL license on the second node
- C. two 500-user ADD licenses, one on each node
- D. two 1,000-user ADD licenses distributed equally across the two nodes

Correct Answer: C

QUESTION 3

What are two operational capabilities of the Secure Application Manager client? (Choose two.)

- A. Automatically launches the client upon user browser initiated login.
- B. Controls access policy to network subnets and servers.
- C. Forces Java JRE update on SAM client installation.
- D. Restricts use of machine COM ports.

Correct Answer: AB

**QUESTION 4**

You have just upgraded the Junos Pulse Secure Access Service, but now Host Checker is not operational. Host Checker functioned normally before the upgrade. Which Host Checker setting should you verify is enabled in the Admin UI?

- A. Perform dynamic policy reevaluation
- B. Endpoint Security Assessment Plug-In (ESAP) versions
- C. Auto-update virus signatures list
- D. Auto-upgrade Host Checker

Correct Answer: D

QUESTION 5

You want to ensure that untrusted computers that connect the Junos Pulse Secure Access Service have residual data removed after the user session is complete.

Which two Endpoint Security features in the Admin UI achieve this? (Choose two.)

- A. Cache Cleaner
- B. Host Checker
- C. Secure Virtual Workspace (SVW)
- D. Enhanced Endpoint Security (EES)

Correct Answer: AC
