QUESTION 1

You have configured session start and session end scripts to perform several functions when users are accessing resources with Network Connect (NC). At which point during access will your scripts be executed?

A. The start script is executed before the NC session has started; the end script is executed before the session has ended.

B. The start script is executed after the NC session has started; the end script is executed after the session has ended.

C. The start script is executed after the NC session has started; the end script is executed before the session has ended.

D. The start script is executed before the NC session has started; the end script is executed after the session has ended.

Correct Answer: B

QUESTION 2

What are two reasons to add an Instant Virtual System (IVS) to your network? (Choose two.)

A. You want to allocate CPU and memory resources to different authentication realms.

B. You are a service provider and you require a multi-unit cluster.

C. Your private network consists of multiple VLANs for each department, and each department has its own administrator.

D. You are a service provider and you want to lease out an IVE device to more than one customer using only one physical device.

Correct Answer: CD

QUESTION 3

You have just finished creating an IVS on your device. You can log in to your IVS but you cannot access any backend resources. What should you troubleshoot first?

A. Verify that you have associated your IVS to the correct VLAN.

B. Verify that you have allocated enough users for your IVS.

C. Verify that you are not blocked because of an untrusted certificate on the IVS.

D. Verify that you have associated your IVS to the correct virtual IP.

Correct Answer: A

QUESTION 4

Which condition in a resource policy rule properly expresses that Cache Cleaner is disabled?

A. cacheCleanerStatus = None

B. cacheCleanerStatus = 0

C. cacheCleanerStatus = Null

D. cacheCleanerStatus = False

Correct Answer: B

QUESTION 5

Why would you create a virtual port on your IVE device?

A. You are installing multiple server certificates to support different hostnames.

B. You are configuring your IVE device in a "two-arm DMZ" deployment configuration.

C. You are configuring SiteMinder authentication, which requires multiple IP addresses.

D. You plan to enable active/active clustering.

Correct Answer: A
